RE: CT-1347 Status and Section 30 Revisions

Dear Jeremy:

Per our conversation this morning, the expected start-up date for the first phase of the Expansion Project (CT-1347) has been postponed. Construction will continue, but at a slower pace than originally planned. However, the modifications to the existing calciners (AQD #s 17 and 48) has proceeded as planned. One of the calciners (CA-1) associated with the common stack of AQD #17 has been modified, as well as AQD #48 (CA-3). Official notification of the completion of these projects is forthcoming.

Following is a table depicting the revised schedule for the three phases of construction for CT-1347.

Phase	Begin Construction	Start-Up	Source AQD #
I	February 1998	September 2000	76, 79, 80, 81, 82
II	March 2000	January 2001	83
III	March 2002	January 2003	85

The revised schedule for CT-1347 modifications to existing sources are noted in the table below:

Source AQD #	Begin Modification	Complete
17 (CA-1 only), 48	February 1998	February 1998
17 (CA-2 only)	1st Qtr 1999	1st Qtr 1999
2B, 47	3rd Qtr 1999	3rd Qtr 2000
10,11,14,44	1st Qtr 2000	3rd Qtr 2000
53	1st Qtr 2000	1st Qtr 2001

As I mentioned, I met with David Hill on February 19th concerning our plans to revise Section B of our Section 30 permit application. The revision will include MD-282, CT-1347, and permit waivers that have been issued since

the original submittal of the Section 30 application in November 1995. We anticipate completion and submittal to your office within the next few weeks, definitely before April 20.

If you have any questions concerning the revised schedule for CT-1347, or our plans to revise Section B of the Section 30 permit application, please contact me at (307) 872-6571.

Sincerely,

A handwritten signature in black ink, appearing to read "Dolly A. Potter". The signature is fluid and cursive, with the first name "Dolly" being the most prominent.
